# CATALOGUE

## Service

**OEM Customization**

Minor customization with logo,package or graphics

**ODM Service**

Support ODM service

**Sample-Based Customization**

Support sample or graphics customization

**Full Customization**

Support deep customization with different standard and technology

**SDK Available**

Workable to provide the free SDK for integration

## Quality control

**Raw Material Traceability**

Support material audit trial

**Finished Product Inspection**

100% full test for each order

**QA/QC/ Team**

With professional QA/QC team

**Testing Equipment**

With life span test and whole lock test with real condition
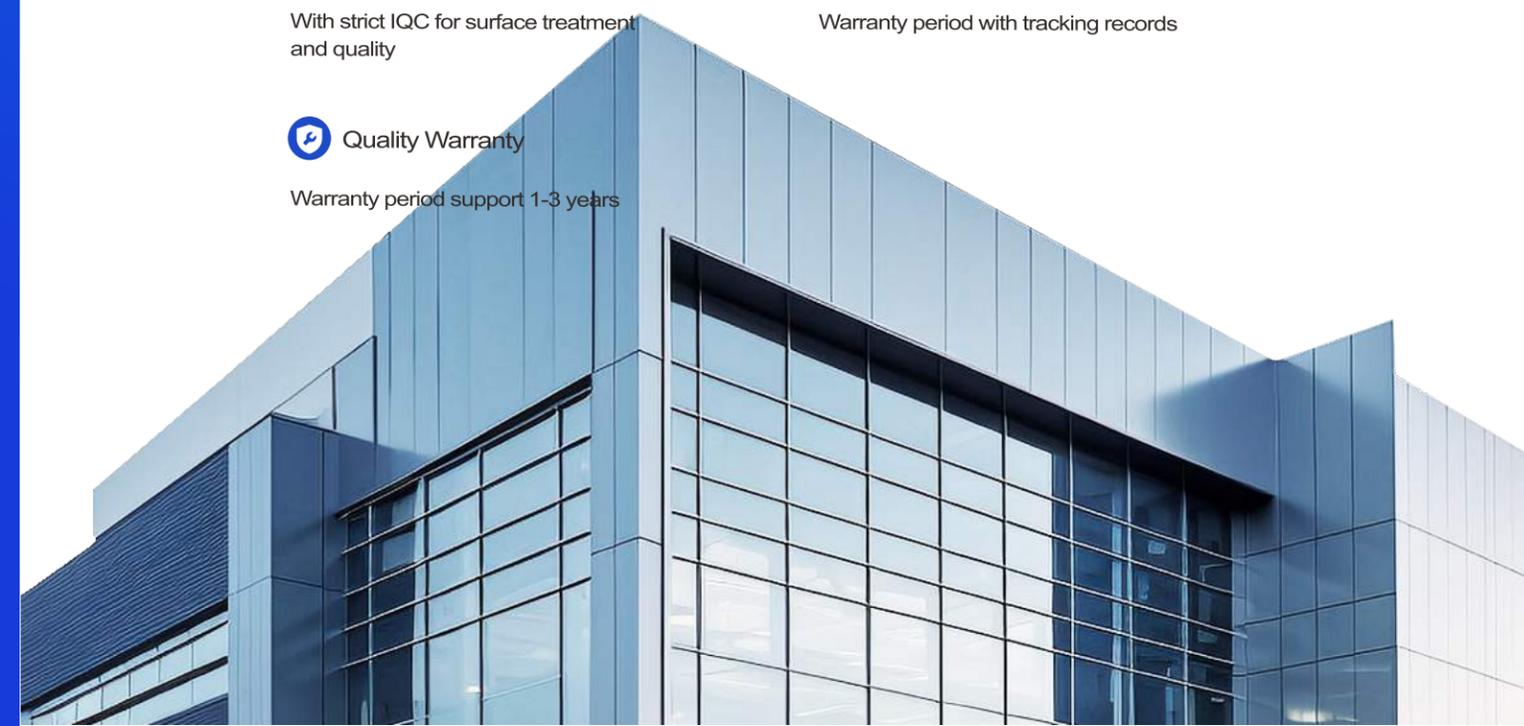

**IQC Inspection**

With strict IQC for surface treatment and quality

**Quality Traceablity**

Warranty period with tracking records

**Quality Warranty**

Warranty period support 1-3 years

CE  FC  RoHS  ISO  TÜVRheinland  UKCA  UL  ANSI  IP65  BSCI

# COMPANY PROFILE

Cerraduras Fechaduras
Inteligentes

JIANGSU SOHO INNOVATION & TECHNOLOGY GROUP CO., LTD. was established in 1974 and initially engaged in mineral export trade. Since 1980, we have been engaged in the export of traditional small hardware products, including door locks, hinges, screws, and other products. We are good at providing customized solutions to customers and providing technical consulting services.

In 2021, we officially entered the smart door lock market. At present, we have two major series of home locks and hotel locks, and have accumulated rich experience in hotel lock projects, Our project experience covers 9 provinces in China, covering both cold and hot regions.So we can provide comprehensive services to our customers.
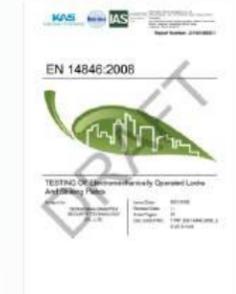

SOHO LOCK locks your safety and wealth.

EN12209    ISO9001-2015    UL10C    IP64    EN14846

# QUALITY CONTROL

PCB LIFE TEST

SSOHO focus on every detail during R&D, manufacturing and sales, we strictly execute the 5S managementrules in the production line to ensure the quality offinal products.

We always strive for excellence from the raw material and use the internationally renowned high-end brand components and parts, which will ensure the stability for our products.The PCB module are with moisture test, mouldproof procession and high-low temperature test, vibration testand life test for special using condition.

## SWITCH LIFE TEST

Energy Saving switch is with 24 hours continuous test under wide range 65~260v. working current capacity is 40AMP, it is much higher than the normal energy saver in the market.

## SMT

SMT PCB production ensured the stability of our lock CPU, which solved the problem of pseudo soldering, welding leakage and short circuit and guarantee your safety during use.

## HIGH AND LOW TEMPERATURE TEST

High and low temperature test for PCB board, which ensure the using life under hot or cold condition.

## CIRCUIT BOARD ASSEMBLY

Integrated PCB module provide one quick solution for maintenance;Friendly software provide you one easy and comfortable experience for managing the whole system!

## LOCK MORTISE

Mortise is with Japan Mabuchi Motor, it is stable and reliable. Continue life test for motor is over 1000,000 times.

# OFFLINE HOTEL LOCK SYSTEM

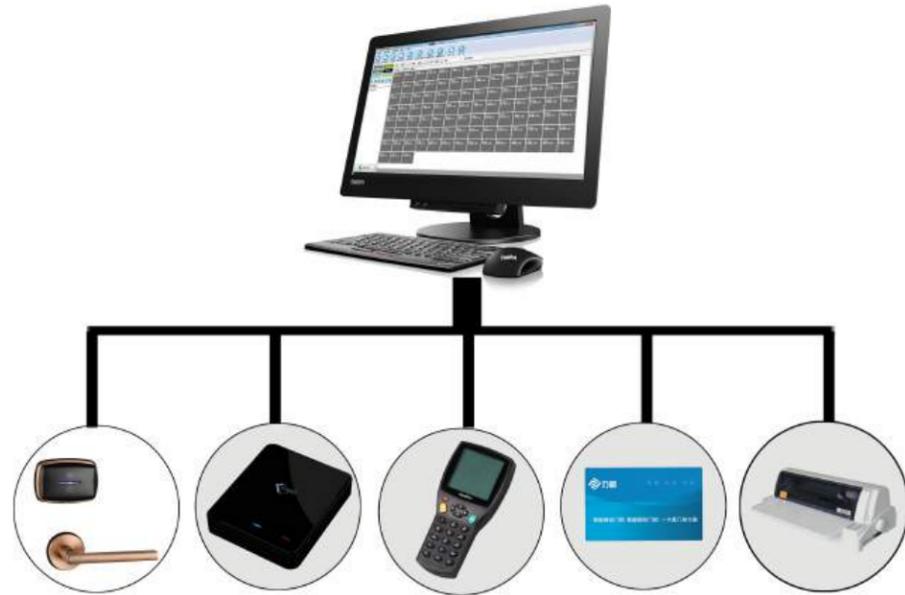

Computer: Memory:500GB above, hard disk suggested 2G above, USB port required.

Software: Windows system, windows 7/8/10.

Database: Windows Access / Microsoft SQL server 2008 above.

Encoder: Read/write card and software registration.

Door Lock: Installed on each room.

LCD Handset: Configure room No.,adjust time, audit trial records etc.

RF Card: Unlock the door lock.

Printer: as request from the site.

## LOCK SYSTEM ACCESSORIES

### MCE02-17 CARD ENCODER

**Technical Parameter**
- Working voltage:DC5V
- Rated current:500mA
- Working humidity:RH 10%~90%
- working temperature:-20° C~55° C
- Reading speed:< 1 S
- Detect type: auto check

**Specification**
- Universal USB port, no need extra driver.
- Auto detect the card.
- Fast reading speed and stable to use
- Support one card system integration

### PHD01-16 LCD HANDSET

**Technical Parameter**
- Working voltage: DC3V
- Static current: < 10 uA
- Working current: <100mA
- Storage humidity: RH 5%~95%
- Working temperature:-25~70℃
- Reading speed: < 1 S
- Size: 177.6 x 85 x 30mm

**Specification**
- One station solution, no need special room setting card
- Fast and correct time adjustment
- Special system checking for hardware and firmware
- Easy to check the card information
- Convenient to check audit trial records
- Support checkout function,

# HTLOCK HOTEL MANAGEMENT SYSTEM

## Networked Hotel Lock System

The HTLOCK software system is one new online system which is based on cloud server to provide more features like room management, device management,room state, authorization for staffs,master card management, audit trial report and abnormal check in alarm and PMS integration etc. The software enabled the functions to unlock with card,mobile app or wechat etc, also it supports the offline system like master card, building card or floor card.
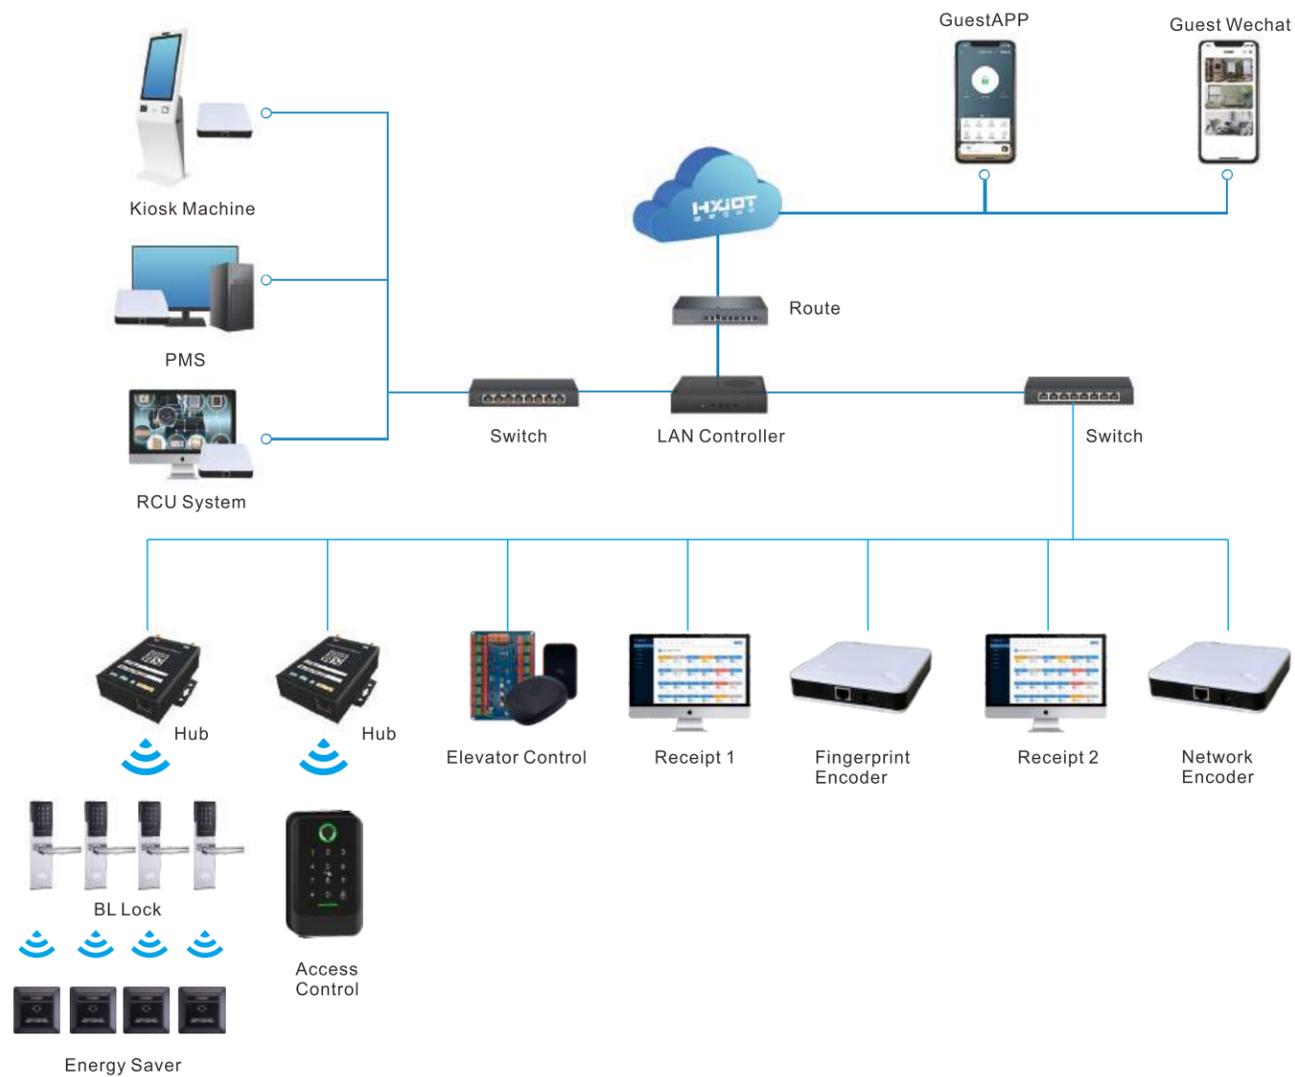

On premise solution,
no need to keep data in supplier cloud

Local+cloud
framework to avoid internet issue

Smart system to adjust time
and low power alarm, reduce management cost

Simple operation
for PMS/Kiosk integration

Energy Saver

433+BLE

# ENERGY SAVING SWITCH

The energy saver is specially designed to be used as power switch in the hotels, home, office, pubs, etc and suitable for Mifare/RF card to control the power with high security. It can save about 40% power consumption in your daily use.

Use method: You can insert one card into the switch to get the power, the signal light will show red. Upon drawing out the card, the power will be off after 15 seconds.

Special function: We offer the special savers that only accept the right room keycard. Such as 101 room, room key card from 102 will not work on101 switch.

# ESS-MF40A

TECHNOLOGY CHANGES THE LIFE

## Product specification

| Model | ESS-MF40A |
|---|---|
| Color | Black White |
| Door panel type | RF energy-saving switch |
| Material | Flame retardant PC |
| Rated power | 7000W |
| Time delay | 15 seconds |
| Operating temperature | -40C - + 50C |
| Type | 0.150 kg |
| Operating voltage | AC220V |
| Size | 86X86X17.5 mm |

## INTRODUCTION

1. Intelligent Energy Saver(Model: ESS-MF40E)
Insert the RF card to the saver and power on the device inside the room, it is simple to install the saver and connect the cable with the input/output/null pole, it is safe and convenient to use with the high performance relay.

2.Room No. Type Energy Saver(Model:ESS-MF40S )
Only the right room card can be used on the saver for power. it is simple to install the saver and connect the cable with the input/output/null pole.

# ELEVATOR CONTROL

● Long reading distance（0~30mm）
● Support hotel guest card, no need extra software
● Three mode: free mode, Floor mode and Floor+time mode.
● Direct function: touch card and reach to the floor directly .
● Support public floor and valid time setting.
● Support audit trial function: 2000 records maximum.
● Fully compatible with the hotel locking software..
● Stainless steel reader with rubber gasket.

# PATENT MORTISE

## 70# ANSI Mortise

M70#-204×29mm

M70#-240×22mm

M70#-204×29mm Reverse

M70#-240×22mm Reverse

### Specification:

With standard 70mm backset ANSI mortise.

Inside parts are with blue zinc treatment to reach the environmental protection requirement.

Microswitch inside the mortise is with over 1000,000 times life test.

Latch and deadbolt parts are with 304# die casting stainless steel material,durable and reliable.

Flat spring for the mortise is with imported piano wire with 500,000 times life test.

Spindle part is with special steel and heat treatment with over 1000,000 times test.

High quality motor with 500,000 times life test. ensure the long years use.

Patent structure design with simple change for left and right direction.
